HOW TO SET UP YOUR iPAD TO RUN TIMERDATA SOFTWARE

1. On your iPAD

- Go to App store http://itunes.apple.com/US/app/id479229407
- Download free logmein app
- **Logmein sales and help #** 1-866-478-1805. Their tech support is great!

2. On your PC or laptop

- Follow link to Log Me In and create an account
- https://secure.logmein.com/products/createaccount.aspx
- Download the free software to your PC

3. Load TimerData onto your Windows-based machine using this link
http://www.noboxinc.com/timer_data/trial.html

4. You now have remote access to your PC for any purpose, including running Framework for PC software!

EXTERNAL KEYBOARDS:

When using TimerData with an iPAD, an external keyboard is recommended. Below are 2 sources for keyboards to assist with data collection and to give you as much screen space as possible.

- From Zagg:
